Exceptional
Pediatric Dentistry

**PROVIDING FOR THE
ORAL HEALTH OF CHILDREN**

For most children, going to the dentist for the first time can be a frightening experience. However, the patients at Dr. Bain's office say it's the complete opposite. Very early on during his studies at dental school, Dr. Bain realized that the stoic and stern, coat-and-tie practice was not for him. "My dad has always been a practical joker and that became a permanent part of my personality." Specializing in pediatric dentistry was the natural and perfect choice to allow him to incorporate his style and demeanor as a primary tool in providing for the oral health of children.

PARENTS FEEL AT EASE

From the moment you walk into his office, you'll know your children are in a special place. Greeted by friendly faces and happy smiles, your children will immediately feel at ease in his home-like setting, complete with children's movies and a gaming arcade. Dr. Bain has a special gift that allows him to make your child feel comfortable enough to open up, talk, and laugh. Parents also feel at ease sitting chair-side in his open-bay treatment areas. They too, are invited to join in the fun while voicing any questions or concerns they may have at every appointment. "I specialized in pediatric dentistry for that very reason," he says. "Every

smile, laugh, high-five, or hug earned after an appointment is the most rewarding aspect of my practice. When my wife and I are out and about and children run over excited to say hello, I know we have successfully removed the 'scary face' of dentistry."

ENJOYABLE PEDIATRIC DENTAL EXPERIENCE

LATEST TECHNOLOGY

Dr. Bain is a graduate of Baylor College of Dentistry and Children's Hospital of Buffalo. He began his private practice in 1995, and, in 2005, became the first and only pediatric dentist in Pflugerville. He loves educating patients and parents about the importance of oral health at an early age, using the latest technology in digital x-rays and intra-oral photography. "We strive for the perfect balance of science, art, and positive interaction," he says. "We are looking forward to seeing you and proving just how enjoyable the pediatric dental experience should be!"
